PEG-INTRON®
Peginterferon alfa-2b Powder for Injection

Questions to Ask Your Doctor about Hepatitis C

- How is my body being affected by hepatitis C?
- What is the level of virus in my blood?
- What does this level mean for my treatment, and for my chance of infecting others?
- What about my other test results? What do they mean?
- What are the results of my genotype test?
- How will my genotype influence my response to treatment?
- What precautions should I take to avoid infecting other people?
- How much experience do you have in treating hepatitis patients?
- Do you recommend that I see a hepatologist (a specialist in liver disease) or a gastroenterologist (a medical specialist in digestive disease) for my care?
- What steps can I take to protect my liver and help me feel better?
- What treatments are available, and which ones do you recommend?
